State Contract Access + Procellis Delivery = A Faster Route From Modernization Need To Operational Outcome

01 Modernize the foundation

Servers, storage, cloud virtual infrastructure hosts, networking, cabling, endpoints, deployment, and lifecycle support.

02 Bring AI to your data

Secure on-prem, hybrid, and edge-to-core patterns for sensitive public-sector data, not one-size-fits-all AI tooling.

03 Move from plan to PO

Readiness assessment, quote language, contract numbers, procurement steps, and technical implementation support.

PRIMARY OFFER

MN Public Sector AI Infrastructure

A practical review of compute capacity, storage scalability, endpoint/workforce needs, data location, backup and cyber recovery, security posture, AI use-case fit, contract procurement path, and modernization roadmap.

Structured delivery: current-state discovery, governance, architecture, deployment, operations, and continuous improvement.
